

Putting the Care Provider First

Our Journey to Digital Adoption in SNEE ICS

Julie Irving – Deputy Digital Programme Director and Health & Care Programme Lead

Gina Trimble – Provider Liaison Manager

Suffolk and North East Essex Integrated Care System

Where are we now?

Moving from a paper-based system, to a DSCR system has been a **positive experience**

NOBI: the impact for us have been amazing. The sleep reports have assisted the wake night staff to monitor residents' habits at night - we have a resident who self-harms and with the sleep pattern the staff know at night if she is out of bed or sitting on the side of the bed and the staff will knock on the door to check they are ok and not scratching and then distract her if necessary.

Service Users can **actively participate** in their own care

Feedback have more time to spend with m

Dashboard is **user friendly** and care plans are more in depth

Staff members have said **how easy it is to use** and that they are able to read the handover throughout their shifts

Helped to **improve communication** and **collaboration** among our care team members

Less **time** spent looking through paper documents which has been **reinvested** into **caring** for the residents

Nobi I am really beginning to love. Staff are beginning to get the hang of it and I am working with them to use more in depth entries on accident forms of not only how they were alerted by Nobi but how they **analysed a fall** on Nobi and what this showed them

Helped to **minimize** errors, duplications, and inconsistencies

Our digital system in place now, has helped to **ensure compliance** with regulatory requirements, **quality standards**, and data protection regulations

Using our digital care record platform, this has helped to **minimize errors, duplications, and inconsistencies** commonly associated with paper-based documentation

Since implementing the DSCR system we have been able to **save many admin hours**

Cuts down on paperwork and ensure issues can be addressed quickly
